

We are looking for a

Senior Backend Developer

to join our development team

Have you ever dreamed of living and working in one of the largest ski resorts in Switzerland?

Are you passionate about the latest web and mobile technologies?

Does the idea of driving the digital revolution in the travel industry sound exciting?

We're looking for a **Senior Backend Developer** to grow our **digital destination experience platform "Omni Suite"** based on technologies such as JavaScript/TypeScript, React Native, Node.js, Postgres, Redis and others.

The Omni Suite is a tech framework empowering destinations and organizations in travel to create meaningful guest experiences and super charge their customer relationships along the entire life cycle.

inside labs

What we expect

Omni integrates many individual services into a single guest experience. To master this we need experienced backend developers who want to understand the complexity within the tourism industry and translate this into technical solutions empowering as simple as possible guest experiences. If you like thinking and solving complex problems, then we have some challenges for you.

Responsibilities

- Design and implement highly reliable and scalable technical infrastructure
- Implement complex business logic for multi-tenancy projects
- Contribute with feasibility studies within the product innovation team

Requirements

- A Master Degree in Computer Science or related
- Proven track record with 2-5 years work experience related to our tech stack and ideally tourism industry
- Willingness to challenge yourself

The right attitude is considered as important as demonstrated skills!

What we offer and who we are

We're up to challenge the status quo and currently growing from a start-up company into a growing and sustainable business. To master this challenge we need additional skills to master what's ahead of us. Nevertheless we want to stay true to our core values and hope to find someone who is passionate about the following:

- Live and work in one of the largest ski resorts in Switzerland with 235 km of slopes, 28 Lifts, 4 snow parks and the world's largest halfpipe
- A dynamic, young and driven team
- The possibility to contribute to an enterprise-ready platform based on cuttingedge technology
- Extremely flexible work schedule
- A competitive salary and additional benefits

To get to know us a bit better, check out our story [here](#).

Please send any applications or questions to talkto@insidelabs.tech.

We expect a CV and ask you to exhibit your experience(s) of maintaining and contributing to a solution consisting of backend, multiple API's and third-party systems in B2B or B2C environments.
