

Technical Product Lead

Have you ever dreamed of living and working in one of the largest ski resorts in Switzerland? Are you passionate about the latest web and mobile technologies? Does the idea of driving the digital revolution in the travel industry sound exciting?

We're looking for a technical product lead to scale and grow our digital destination/resort experience platform "Omni" based on technologies such as JavaScript/TypeScript, React Native, Node.js, Postgres, Redis and others.

Omni explained

Omni is a tech platform empowering destinations and organizations in travel to create meaningful guest experiences and super charge their customer relationships along the entire life cycle. For more information check out insidelabs.tech or get in touch with us.

What we expect

You're in charge of an agile and passionate team of front- and backend developers. You drive the technical agenda together with a product team and clients to disrupt tourism and the underlying technology.

Responsibilities

- Design and implement highly reliable and scalable technical infrastructure
- Implement complex business logic for multi-tenancy projects within the tourism industry
- Contribute to our product roadmap and shape the tech landscape for mountain tourism organizations
- Lead development teams, create and manage requirements
- Ability to estimate developments, manage progress towards defined goals and communicate within the company

Requirements

- A Master degree in Computer Science or related

- Proven track record with 5+ years work experience related to our tech stack, building production-ready and highly reliable software ecosystems
- A track record of leading engineering project teams and working with cross functional partners to deliver technical solutions

The right attitude is considered as important as demonstrated skills!

What we offer and who we are

We're up to challenge the status quo and are currently growing from a start-up company into a growing and sustainable business. To do this, we need additional skills to master what's ahead of us. Nevertheless we want to stay true to our core values and hope to find someone who is passionate about the following

- Live and work in one of the largest ski resorts in Switzerland with 235 km of slopes, 28 Lifts, 4 snow parks and the world's largest halfpipe
- A dynamic, young and driven team which you'd lead
- The possibility to take-on and improve an enterprise-ready platform based on cutting-edge technology
- Extremely flexible work schedule
- A competitive salary and additional benefits
