We are looking for a

Senior Backend Engineer

Node.js and TypeScript (On-Site or Remote)

Have you ever dreamed of living and working in one of the largest ski resorts in Switzerland? Are you passionate about the latest web and mobile technologies? Does the idea of driving the digital revolution in the travel industry sound exciting?

We are looking for senior backend engineer to grow our digital destination/ resort experience platform "Omni Suite" based on technologies such as Node.js, TypeScript, GraphQL, React, React Native, MobX, Postgres, and others living on AWS infrastructure.

The Omni Suite Explained

The Omni Suite is our platform empowering tourism destinations and organizations to create meaningful guest experiences and super charge their customer relation-ships along the entire life cycle. For more information check out insidelabs.tech or get in touch with us.

What We Expect

The Omni Suite integrates many individual services into a single guest experience. To master this we need an experienced backend engineer who understands the complexity within the tourism industry and translate this into technical solutions empowering as simple as possible guest experiences. If you like thinking and solving complex problems, then we have some challenges for you.

inside labs

Your Responsibilities

- Implement reliable, yet efficient solutions for complex business requirements using TypeScript and Node.js

- Build integrations with 3rd party systems to connect them with our Omni Suite

- Conceptualize solutions to new requirements on your own or collaboratively

- Team up with frontend engineers to build interfaces for the Omni Suite using GraphQL

- Continuously maintain and improve the code bases of our existing backend applications

- Support our product innovation team with feasibility studies

Our Requirements

- Proven track record with 5+ years work experience in backend engineering using our tech stack

- Be a pro-active communicator, able to work in an asynchronous environment

- Willingness to challenge yourself

Things That Help You Stand Out

- Hold a bachelors or masters degree in computer science or a related field

- Have the ability to work across our full tech stack

- Have hands-on experience in the marketing business domain, ideally tourism industry

The right attitude is considered as important as demonstrated skills!

What we Offer and Who We Are

We are up to challenge the status quo and currently growing from a start-up company into a growing and sustainable business. To master this challenge we need additional skills to master what is ahead of us. Nevertheless we want to stay true to our core values and hope to find someone who is passionate about the following:

- Live and work in one of the largest ski resorts in Switzerland with 235 km of slopes, 28 Lifts, 4 snow parks and the world's largest halfpipe - although, we are a remote company and you may live and work wherever it pleases you

- An enthusiastic team, keen to share know-how and always striving to enable the best digital guest experience for our customers

- Use state-of-the-art technology to develop and evolve the Omni Suite, our enterprise-ready SaaS platform

- Flexible working hours, with time for that powder run in the morning

- A competitive salary with additional perks like a free season pass for our home resort

To get to know us a bit better, check out our story here.

Please send your application, consisting of your latest CV, a cover letter, and any additional material to Manuel Alabor via talkto@insidelabs.tech
